* = Power measured with petrol Octan 98 (standard specification 173PS/ 174Nm)

N/C = No cost option

The fuel consumption and CO2 emission values stated correspond to the WLTP approval (EU Regulation 2017/948). From 1 September 2018, new vehicles will be type-approved on the basis of the Worldwide Harmonised Light Vehicle Test Procedure (WLTP), a new and more realistic test procedure for measuring fuel consumption and CO2 emissions. This WLTP procedure completely replaces the New European Driving Cycle (NEDC), which was previously the test procedure. As the test conditions are more realistic, the fuel consumption and CO2 emissions measured using the WLTP method are in many cases higher than those measured using the NEDC method. Fuel consumption and CO2 emission values may vary depending on equipment, options and tyre type.
